

Building the College Curriculum

Discussion Questions – Implementing the Senior Phase

School leaders are being challenged to **transform** the school curriculum. What are the potential implications for your college and for the college sector?

For example:

1. What contributions might colleges make to the different models of curriculum and progression in the Senior Phase that are being considered by schools and local authorities?
2. How may aspects of current partnership arrangements and current college provision for school-age pupils and school leavers change to implement the new arrangements for collaborative delivery (eg, 'hubs' etc) that are being considered?
