

Building the College Curriculum

Discussion Questions – Implementing the Senior Phase

1. What challenges do you face in ensuring that you can deliver all the entitlements for all young people in the Senior Phase?

You may wish to consider or comment on:

- How can you best work with other sectors and partner agencies to develop a coherent and inclusive curriculum?
- Continuing to develop the 4 capacities as well as delivering qualifications.
- Continuing to deliver skills for learning, life and work.
- Providing personal support throughout learning and in moving into positive and sustained destinations.

2. How will you plan to ensure that the responsibility of all – health and wellbeing across learning, literacy across learning and numeracy across learning – continue into the Senior Phase?

You may wish to consider or comment on:

- Raising staff awareness and understanding.
- Embedding these responsibilities within college culture, eg: exemplifying with college policies on well-being.
- Embedding the responsibilities within curriculum planning/course design and Learning and Teaching strategies.
