

North Glasgow College

International Links

North Glasgow College is renowned for providing high quality education to all students studying at the college. As our international links continue to develop, we are committed to providing this same standard of training and support to international students based both in Scotland and their home country. We recognise that International student recruitment and partnership programmes are important to both the Scottish culture and economy.

Our college currently welcomes students from countries across the globe – from Bangladesh to Zimbabwe, China to Uganda. These students contribute greatly to the life of our college and are welcomed by both staff and students.

North Glasgow College also boasts well established links with institutions and agents in Bangladesh, China, Egypt, India and Libya.

In China, we are currently working in partnership with the Scottish Qualifications Authority (SQA) and educational institutions to develop joint HND programmes. This exciting venture is the beginning of a new phase of our work in China.

Our Engineering Technologies department has developed links with Libyan corporations and, in partnership with two other colleges, is delivering an HND Mechanical Engineering to company employees. Proof surely that the value of SQA qualifications and North Glasgow College education has value worldwide.

As the International market continues to develop, North Glasgow College has its sights firmly set on future partnerships. In 2007 staff from our International Business Unit will participate in an Education UK mission to India. This mission will give us the opportunity to develop existing partnerships and to establish new links.
